

# PrEP Prevents HIV!

## SAFETY FIRST!

PrEP (pre-exposure prophylaxis) is a medicine you can take to prevent getting HIV. You could be at risk for getting HIV if you share needles or works.

**WEAR SAFETY EQUIPMENT!**

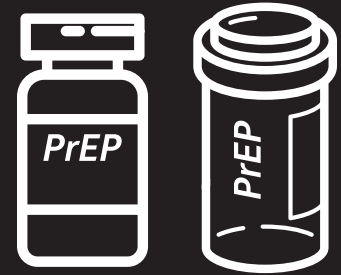

**USE CONDOMS!**

**DON'T SHARE TOOLS!**

**NEVER SHARE NEEDLES, SYRINGES, OR OTHER WORKS!**

**USE THE CORRECT TOOLS FOR THE JOB!**

**PrEP IS AVAILABLE AS A PILL OR A SHOT!**

*It's not just for gay men. It's not just for people whose sex partners have HIV.*

PrEP can lower your risk of getting HIV from injection drug use by 74%

PrEP can lower your risk of getting HIV from sex by 99%

**One pill, once a day or a shot every 2 months!**

*Ask your counselor if PrEP is right for you!*
